- GENERAL STATEMENT** My primary goal is to develop robust applications using modern dynamic languages. I would also like to work in an environment that allows me to apply my interest in the fields of machine learning and automatic reasoning to real world problems.
- EDUCATION**
- **UMBC**, Fall 2003 – Fall 2006 *Incomplete* (Computer Science)
 - **Howard High School**, 2003 Diploma with Certificate of Merit
- TECHNICAL SKILLS**
- **Programming Languages**
 - *Common Lisp* Learned 2003 (advanced). Primary language. Used for web development and personal utilities.
 - *PHP* Learned 2002 (advanced). Used at CBCMedia to develop simple websites.
 - *Javascript* Learned 2005 (intermediate).
 - *SQL* Learned 2003 (advanced). Knowledge of the Relational Model, and PostgreSQL and MySQL specific usage.
 - *C++* Learned 2000 (proficient, but only occasionally use anymore).
 - *Scheme* Learned 2002 (proficient, but rarely use anymore).
 - **Standard Technologies**
 - *XML/(X)HTML/CSS/DOM* Advanced knowledge of widely used web technologies.
 - *XPCOM/XUL/XBL* General familiarity with Mozilla platform and development of applications using XULRunner.
 - *LaTeX* and *TeXinfo* Working knowledge of typesetting languages for authoring technical documents and manuals.
 - *Uncommon Web* Lisp web framework for developing dynamic applications.
 - **General Computing**
 - *GNU/Linux* Full time user since 2000 with basic system administration skills, and a working knowledge of the development environment (make, autotools, sh scripting, etc.).
 - *Apache* Configuration and usage.
 - *PostgreSQL* and *MySQL* Configuration and usage.
 - *Emacs* Used as primary editor since 1999. Expert emacs-lisp customization knowledge.
- PROJECTS**
- **UCW Interface Manager** Advanced presentation based web framework for UnCommon Web.
 - **Bobot++** C++ IRC Bot extensible with Guile Scheme.
- WORK EXPERIENCE**
- **Programmer** CBCMedia (January 2006 – August 2007)
 - Maintained and enhanced existing PHP/MySQL web applications.
 - Developed lightweight article publishing engine and integrated with several sites.
 - **Programmer** SOEP Communications (June – July 2002, June – September 2006)
 - Developed news system and designed company website (2002).
 - Developed mobile web application for field technicians to submit work invoices and time clock information that integrated with the existing billing work flow. (*Background:* SOEP is a retail and office network cabling contractor.)
